

Pierre naturelle / *Natural stone*

# EVEREST

ARDOISE / SLATE

**Brut et contemporain**, le parement **EVEREST** joue la carte des contrastes avec sa teinte grise et son grain structuré.

Grâce à ses nuances de gris et sa texture brute, **EVEREST** vous permet de créer **des décors tout en caractère et sobriété**. Associé à des enduits clairs, il apportera un effet graphique aux constructions.

**Très résistantes**, nos pierres naturelles en ardoise sont **assemblées sur une plaque base ciment**.

Le **calepinage breveté de NOVIROC** permet d'obtenir **un rendu esthétique unique**, sans alignements de joints horizontaux. Le résultat est comparable à la construction d'un mur en pierre massive.

**EVEREST** veneer panels are **rough and contemporary** and give great contrast with their shades of grey and structured texture.

**EVEREST** creates a **strong and sober ambiance** with tints of grey and a rocky appearance. When paired with light coating materials it gives a graphic effect to your buildings.

Our **very resistant** natural, slate stones are **mounted on a cement based panel**.

**NOVIROC's patented pattern** creates a **unique aesthetic finish**, without any horizontal joint alignment. The result can be compared to a built stone wall.

NOVIROC  
LA PIERRE NATURELLE

## Une pose parfaite, un résultat impeccable, avec notre système de pose breveté.

Notre solution d'agencement pour murs et façades vous garantit un résultat sans alignement de joints, ni distinction de plaques.

L. ± 52.2 x h. 22 x ep. 4 cm  
L. ± 15.5 x h. 11 x ep. 4 cm

L. ± 34.5/14.5 x h. 22 x ep. 4 cm  
L. ± 22.3/22.3 x h. 11 x ep. 4 cm

## Perfect fitting for flawless results, with our patented fitting system.

Our decorative solution for walls and façades guarantees you a joint-alignment-free result without a trace of sheet separations.

### NOVIROC panels

weight approximately 80 kg/m<sup>2</sup>.  
Fitting them requires  
**DOUBLE SPREAD GLUING + MECHANICAL MOUNTING**  
for heights above 2 m.

### Suitable surfaces:

- Banked concrete façades
- Masonry walls and façades coated with an under coat

### Patented fitting system:

**Our fitting system entails an Opus laying pattern for specially shaped panels.**

The large NOVIROC Z shaped panels are asymmetrical. On one side they have a small notch and on another side they have a large one.

For aesthetic results of random stones with a seamless finish similar to a genuine stone wall you will need to follow our OPUS pattern.

The pattern assembles two large panels and one small one following the attached plan. The corners have been designed to interlock perfectly this way.
